Deadline for manuscript  
submissions:

**31 March 2022**

### Message from the Guest Editors

Dear Colleagues,

Nanotubular and nanofibrous clay minerals, such as halloysite, chrysotile, palygorskite, sepiolite, etc., have been attracting more and more research attention, because of their unique one-dimensional structure, easily regulated properties and diverse applications. This Special Issue entitled “Nanotubular and nanofibrous clay minerals” will cover both fundamental aspects and actual applications of the abovementioned clay minerals. We would like to solicit high-quality research papers in areas including (but not limited to) synthesis, characterization, modification, properties of nanotubular and nanofibrous clay minerals, as well as their applications in environmental protection and remediation, materials science, engineering, agriculture, medicine, and energy. Both original research articles and reviews are welcome.

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

*Minerals* welcomes submissions that report basic and applied research in mineralogy. Research areas of traditional interest are mineral deposits, mining, mineral processing and environmental mineralogy. The journal footprint also includes novel uses of elemental and isotopic analyses of minerals for petrology, geochronology and thermochronology, thermobarometry, ore genesis and sedimentary provenance. Contributions are encouraged in emerging research areas such as applications of quantitative mineralogy to the oil and gas, manufacturing, forensic science, climate change, geohazard and health sectors.

## Author Benefits

**Open Access:**— free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [GeoRef](#), [CaPlus / SciFinder](#), [Inspec](#), and many [other databases](#).

**Journal Rank:** [JCR - Q2 \(Mining & Mineral Processing\)](#) / [CiteScore - Q2 \(Geotechnical Engineering and Engineering Geology\)](#)
